

Closet Factory Introduces New And Innovative Custom Garage Designs®

Leading Home Organization Brand Introduces New Garage Storage Product Line Nationwide

Los Angeles, CA (PRWEB) June 06, 2011 -- Closet Factory Franchise Corporation Headquarters is proud to introduce a new and innovative [custom garage](#) product line and several new, garage-related services.

The new product line includes a wide variety of custom shelving, cabinetry, and workbenches along with rolling islands that are ideal for extra storage and counter space. Other new features include metal slat wall in a variety of colors to replace the traditional pegboard and specialized racks for storage of sports equipment.

Consumers have long been outgrowing their interior living space and many homeowners are now treating the garage as an additional room, and not just a place to store cars. In response to this trend, Closet Factory has enriched and expanded their garage cabinets and storage collection.

Kay Wade, Vice President of Design and Head Designer had this to say; "Garages have evolved into an additional living space in the home and our new designs are concepts that can also be applied to any part of the home!"

New materials for the cabinet structures and doors include brushed and textured stainless steel, brushed aluminum, faux leather accent faces in brown and in a black pebble texture. Other new materials include the two-toned Italian Zebrawood and dark, textured melamines black or grey diamond plate. Still available are old favorites white, antique white, almond and maple.

For those consumers who bring the outdoors into their garage with them, Closet Factory now offers custom cabinetry made from waterproof resin known for its durability and resistance to high humidity. They also offer a full line of functional and decorative feet to keep floor-based cabinets up off the floor.

Their new garage-related services program includes garage floor coverings, temporary portable-storage for the duration of the garage makeover, and more. Available services vary by location.

About Closet Factory

Closet Factory and their franchise network are leaders specializing in custom storage solutions for the entire home. Each unit they make is designed, manufactured and installed to the unique specifications of the customer. Closet Factory is both a member of the NAHB and an ASID industry partner. In the past three decades the Closet Factory's product line has expanded from custom closet designs to home office solutions, wall beds, entertainment centers, laundry room, kids play rooms, pantry, wine rooms, craft and hobby rooms, mudrooms and an extensive custom garage line including man caves.
