the art of organization

How We Work

Think of a designer as your own personal interior designer, space planner, and professional organizer. You tell them what you want and how you want it, and they will do everything they can to achieve your dreams. Your designer will get to know you while giving you undivided attention throughout the entire process – from initial consultation through the day of installation – to ensure your satisfaction.

Once you approve your design and pricing, we'll then set an installation date, which will bring you that much closer to realizing your vision!

And remember, we won't move forward until you're ready.

At the beginning of the design process, your designer will:

- Examine the space you want to transform to determine the range of possibilities.
- Measure the space with precision and care.
- Take an inventory of your belongings (if you want to get a head start on the design process, we recommend using our closet inventory tool).

Designers have a complete toolkit to make the design process easy, fun, and creative:

- Idea Book: Filled with design ideas and inspiration, including photos from jobs your designer has worked on in the past.
- Samples: All the materials, finishes, and hardware we offer, right at your fingertips. Literally.
- Design Software: Our designers utilize 3D software for easy design visualization. See your organization dreams come to life on-screen, ready to be modified with embellishments such as molding, onlays, and many more to match your style.

Your designer will employ these tools and many more to help you design something that is truly yours.

Once you've chosen an organizational design along with your preferred materials, colors, and accessories, it's time for the finishing touches!

- Choose from an extensive collection of specialty items including lighting, mirrors, and distinctive hanging rod finishes.
- Your designer will work with you to seamlessly integrate them into your design to finalize your organization vision.

Your designer will present you with pricing options after providing you with the full range of options and selections. This allows you to make the decision that is right for you and will leave you with a price and solution that you will be satisfied with. Once you approve your design and pricing, we'll work with you to set an installation date, bringing you that much closer to realizing your vision!

Your designer won't move forward until you're ready. Remember, you're working with a designer, not a salesperson. They're committed to your satisfaction, not to making a quick sale.

THINGS TO THINK ABOUT

Once you've scheduled your design consultation, it's time to think about your needs and desires. What do you want to get out of your Closet Factory system? Your system will be as unique as you are, and we want to make sure it does everything you expect it to.

What do you want out of your design? Why do you want those things? Here are some more specific questions to ponder while waiting for your consultation:

Better Organization

- Do I find it hard to be organized at home?
 - Do I have difficulty finding what I want when I need it?
 - Are my belongings visible and accessible?
 - Are my needs frequently changing?
- Do I need a system that can adapt with me?

Improved Aesthetics

- Am I looking to match my design to my furniture, my walls, or the rest of my home?
- Do I want a system that lets me display my most valued belongings and mementos?
- Do I feel that something is missing from my home?
- Do I want my space to look more luxurious or more functional?
- Do I wish to carry elements of adjoining rooms into my space?

More Space

- Does my space feel too small?
- Is clutter overtaking my home?
- Am I making the most of the available space in my home?
- Do I want to have more usable space?
- Do I have stuff in other areas of my home that I can consolidate?
